

The Committee of APAC would like to thank their loyal volunteers, customers and supporters for their dedication to animals and we wish each of you a very happy and healthy New Year. In 2023 we achieved so much and this year we hope to achieve even more.

Our shop prices are still very competitive and economical and have not increased much during the past few years compared with the general increase in living.

Over the years we estimate that we have helped thousands of animals in numerous ways and with the proactive media team we will now together achieve more objectives this year.

DOGS

The last few months of 2023 have been very busy for APAC. During one weekend, nine 10-day-old puppies were found abandoned in a box during a storm. Through our social networks and friends of APAC we were able to find foster homes quickly. These amazing people were prepared to bottle feed two or three puppies every 3 hours day and night. This is the kind of commitment and dedication that is so valuable to us. If you would like to add your name to our list of foster carers, please complete the form on our website at www.apaccampello.com/foster

A dog named Sushi was returned to APAC after his daddy had passed away suddenly. Fortunately, we were able to find an immediate foster care home for him and after a few days, he was formally adopted. An interesting development is that although Sushi had a microchip when he was first adopted, the chip could not be found when he was returned to us - even an X-ray could not find it. Although this is uncommon, it can happen occasionally. When you next take your animal to your vet, please ask them to check the microchip is still there and functioning properly. Please also check that your contact details at RIVIA are correct. You can do this by logging in the with chip number and your NIE or DNI. The website address is www.intranet.rivia.org/propietarios/

CATS

In November a member of the public found a kitten lying in the grass near the Centro de Salud in Campello. The poor kitten was badly injured, having a broken jaw and a broken leg. The jaw was successfully repaired, but the leg needed to be amputated. We think that the kitten was either hit by a car, or had fallen from a balcony. Remarkably the kitten was very friendly and showed such a positive attitude to her injuries, that we had several offers to adopt her. She is now happy in her new home, with two adoptive brothers. A very happy ending.

MEMBERSHIP / DONATIONS / FUNDRAISING

APAC is contacted hundreds of times every month from people wanting or demanding our assistance. We have extremely limited resources and most people asking for our help have never donated or helped us in any way. We get hundreds of "likes" and "comments" on our Facebook pages but that does not help us help the animals. Please join our "Teaming" account which costs 1€ per month – if the hundreds of people who like our posts joined the "Teaming" scheme, we could help so many more animals. www.teaming.net/apacelcampello

Help us to continue supporting animals that have no voice of their own!

Membership of the Association is €5 per year - application forms are available in the shop or online at our website or by emailing - membership.apac@gmail.com
